

What sets us apart from the rest

GRAPHENE NANO TECHNOLOGY

Revolutionary process infusing graphene nano technology into every Aqua Technics pool. Built like no other, a Graphene Nano-Tech pool is our strongest pool ever.

ANTI-MICROBIAL PROTECTION

Microtech Anti-Microbial Pool Protection guards the pool's surface against the growth of bacteria, making it exceptionally hygienic and safer for your family.

FADE RESISTANT

Available with Pool ColourGuard® surface protection, which resists the effects of UV rays and chemicals, providing superior fade resistance.

PRECISION MOULDS

New designs are built to exacting tolerances. The edge beams are true, the shapes geometrically perfect and the surface finish is without peer.

QUALITY ASSURED

Certified to build to AS/NZS 1838:2021 under license BMP 520101. We are measured and tested by an authorised, independent auditor. Anyone can say they build to the Standard. For your peace of mind always ask for a license number. We also comply to the ISO 9001 Quality Management System.

SUPERIOR STRENGTH

Full sized structural ribs, fully supported steps and bench seating and a 200mm edge beam means the strength is built into the pool. New high strength, corrosion resistant fibreglass produces a stronger, stiffer pool - pools are up to 20% stronger.

LIFETIME WARRANTIES

Pool ColourGuard® Limited Lifetime Interior Surface Guarantee and Extended Lifetime Structural Warranty - our commitment to providing extended warranties above those standard in the SPASA contract.

SUPERIOR MATERIALS

All pools are manufactured using new generation, high performance, corrosion resistant, eco-friendly fibreglass with improved strength and stiffness. Our onsite gelcoat manufacturing facility means daily batching of materials for a better product. Only specialty materials are used - no general purpose products.
